TECHNICAL PROJECTS

Modern Styles | Clothing E-Commerce Store - [Github](#) | [Demo](#)

Skills - HTML, CSS, Javascript, React JS, Gatsby JS, GraphQL, Contentful CMS

- Built with Gatsby JS and GraphQL queries to pull data from Contentful content management system.
- Used Gatsby's optimizations to reduce loading times for pictures, rendering Gatsby images or static images.
- Implemented ability for user to sort through multiple categories of products and pages.

Meals 2 U | Food Delivery - [Github](#) | [Demo](#)

Skills - HTML, CSS, Javascript, React JS, React-Router-Dom, Styled-Components

- A food delivery application landing page built with React JS to display modern design and user-interface.
- Spread out application through various individual components to organize code, utilizing styled-components to organize CSS styling.
- Constructed responsive styling with media queries to increase mobile-friendly design so users have good experience and React-Router-Dom to allow switching between web pages.

Free Gamer | Free PC Games - [Github](#) | [Demo](#)

Skills - HTML, CSS, Javascript, React JS, Gatsby JS, GraphQL, Freetogame API, Styled-Components

- Implemented source nodes to represent data built from Freetogame API.
- Built out home, all-games, and categories pages to give user several options to display game data.
- Organized GraphQL queries to pull a variety of queries depending on user-selection and routing.
- Used styled-components to organize css specific to certain files for organized code base.

EXPERIENCE

Assistant Team Leader, Southwest Cheese, Clovis, NM

April/2020-December/2021

- Improved process parameters to save multiple 15% product loss instances that were occurred every third shift.
- Helped develop new training curriculum to reduce quarterly injuries by 12.5%.
- Assisted team during times of hiring shortages by taking over any missing positions on the team.

Personal Trainer, Anytime Fitness, Englewood, CO

June/2017-June/2018

- Implemented new challenge structure to increase monthly member attendance rates by 20%.
- Changed the equipment flow/layout to free up space for extra machines/more room per machine.
